

XERO

- 93/7 Hungarian Goose Down with a minimum fill power of 750
- NEW He30.rs shell fabric is exceptionally lightweight and highly breathable
- Supersoft lining – our softest and lightest next-to-skin layer
- EXL® top lining improves comfort, loft and thermal efficiency
- Supplied with ultra-light waterproof stuff sack and large mesh storage sack
- Narrow box wall baffles hold down securely in place with minimum weight
- Anatomical hood prevents cold spots around head
- 3-Dimensional neck collar helps to prevent cold spots and heat loss around the neck
- 5 baffle Bulls-Eye foot piece and Sharks Toe design
- ¾ length side zip with anti-snap baffle

Notes

Xero MM does not feature side zip or neck collar
 Xero 750 features interlocking anti-snap baffles
 Available in left hand zip option only

UPDATED

Helium fabrics are designed exclusively for Mountain Equipment. Using our years of design and practical experience and working along side some of the world's finest fabric houses we have developed the Helium range of fabrics. Helium fabrics offer the lightest weights and breathability around so you can ensure that you are getting the maximum from your product.

The down used in these bags is prime quality, ethically sourced, 93% pure Hungarian Goose Down. Each batch is individually tested at point of filling the bags to ensure a minimum fill power of 750 cubic inches.

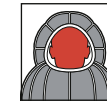

Xero MM featuring Balloonbed concept

The Balloonbed was first developed to meet the needs of elite adventure racers and mountain marathon runners, people for whom reducing the weight and bulk of their kit is a necessary obsession. Making use of professional modelling balloons to form a cushion of air, these light and highly packable air beds replace the need to carry conventional foam mats or self inflating mattresses; products that are simply too heavy and too bulky for multi-day races.

For more information on the original product that helped inspire part of the new Xero MM sleeping bag please visit www.balloonbed.com

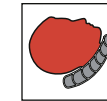

EXL
 Uses an elasticated lining to gently hug your body and improve thermal efficiency.

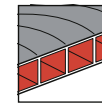

Anatomical Hood
 Carefully shaped profile to maximise comfort and heat retention.

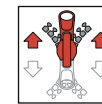

Sharks Toe Foot
 Reduces compression of insulation and allows feet to lie in a natural position.

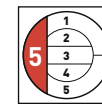

3-Dimensional Neck Collar
 Ergonomic baffle that sits comfortably around your neck to retain maximum heat.

Box Wall
 Highly efficient method of construction that is low in weight.

2-way Locking Zipper
 Allows the bag to be opened from either end - features self locking zip-pulls.

5-baffle Bulls-Eye Foot Piece
 5 individual baffles to keep your feet warm and allow down to loft more effectively.

Mountain Equipment bags are independently tested and all temperatures stated correlate to EN13537
